

SUPER 30 AUTO EJECT, KUSSMAUL

The Super 30 is suitable where greater amps loads are present.

Super 30 Auto Eject

The Super 30 Auto Eject is a completely sealed automatic power line disconnect. This prevents contamination of the mechanism by road dirt and ensure long reliable life, even when mounted in the most severe environment. A novel plug detector closes, and opens the 115/230 volt A.C. circuit after the mating connector is inserted, and before the connector is ejected. This eliminates arcing at the connector contacts, and assures long contact life. As with all Auto Ejects, the Super 30 Auto Eject is connected to the starter circuit so that ejection occurs when the engine is cranked.

MODEL	AC VOLTAGE	DC VOLTAGE	CURRENT	AIR PRESSURE	WARRANTY	KG	WxDxH
091-159-30-115	115	12 or 24	32	N/A	2 Year	2.5	137x122x181
