

AUTO EJECTS SUPER 15, 16

The UK's number 1 self ejecting mechanism, for mains supply to vehicles.

With over 30,000 Kussmaul Auto Ejects supplied in the UK and Europe alone, it has become the industry standard for self ejecting mains connections on Emergency Vehicles.

Available in 15 amp, 16 amp and 32 amp, all versions are available in 115 volt or 230 volt.

The 15 amp use the globally accepted NEMA style connector. 16 amp and 32 amp use the popular and inexpensive IEC 60309-2 connectors.

The eject signal is sourced direct from the starter motor, eject functions as soon as the starter motor is engaged.

Each Kussmaul Auto Eject features a built in micro switch to ensure mains supply is not supplied until the

connector is inserted, reducing the risk of arcing and extending connector pin life.

The Super Auto Eject is a completely sealed automatic power line disconnect. This prevents contamination of the mechanism by road dirt, and ensures long reliable life even when mounted in the most severe environment.

Weather proof covers have colour coding of Yellow for 115 volt and Blue for 230 volt applications, this allows quick and easy visual identification. Other colour covers are available to special order. The front covers are easily replaced should they become damaged.

“Kussmaul Auto Eject; original and the best”
