

# EVP "TRIP" RCBO COMBI RCCD AND BREAKER

## Trip - RCBO Combi RCCD and Breaker

"Trip" has been designed around the need to meet current regulations that have a.c electrical power supplies to automotive vehicles. This combined when installing the Kussmaul™ Auto Eject range and the onboard battery charger make EVP the market leader in onboard vehicle charging.

This high end, quality unit is a combination of MCB and RCD protection providing overload and short circuit protection in one unit. It makes the unit ideal for onboard automotive charging applications by allowing earth fault protection to be restricted to a single circuit thus limiting nuisance tripping. Compliant to BSEN61009-1, the range of units on offer come with a 5 year warranty.

Please ensure you specify 110v or 240v when ordering.

## Features:

- 2 pole electromagnetic RCBO
- 6kA breaking capacity
- Ratings from 6A – 40A
- Earth leakage rating of 30mA
- Complies to BSEN1009
- 110v and 240v options available, combination units do not meet the current regulations
- Integral Test Button
- 5 Year Warranty
