

New from EVP – 173mm and 300mm Grey Interior Lights

The 110 series interior light with grey housing exclusively from EVP.

With a switched, and soon a none switch version, this amazingly versatile light offers a dual colour red/white offering of 5700K~6500K output. With the switch version this makes the unit dimmable, and the light starts with red first and then white when you toggle to the next option.

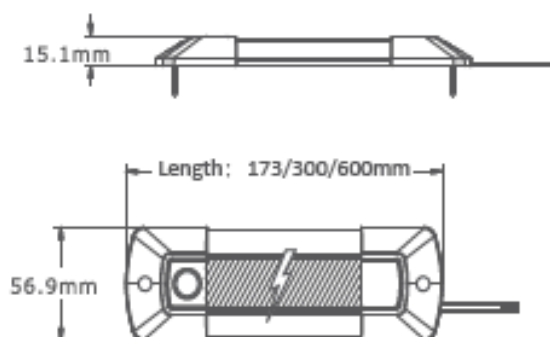

As standard the unit has a secondary positive input which can be connected to a door switch etc. Once power to this input is switched off, the white light will stay on for a 15 second period and then switch off like a curtesy light.

Switched Dual Colour Red/White 173mm long – EVP110A-RW-02G

Switched Dual Colour Red/White 300mm long – EVP110B-RW-02G
