PERFORMANCE AND INNOVATION

Powerful light sources, precision engineered reflectors and high performance optics are the most important characteristics of directional lighting. At Golight®, Inc. we are committed to continually developing and testing new illumination and night vision technologies that produce more powerful and useful light sources. Golight® offers designs for useability in countless applications:

- Powerful Spotlights for intense illumination
- Flood Lens technology for work area illumination
- Infrared Lens for covert night vision enhancement
- Clear Top-Housing for useful light in the completely vertical position
- Pedestal mounts for better lighting angles on fishing boats

GOLIGHT® DESIGN

Golight's patented product designs utilize a combination of halogen and LED's, optical lens and reflector technology to generate extremely bright lights. The designs eliminate dark spots, maximize effective beam distance and provide the user an effective spectral pattern. Golight designs bring more lighting power to your fingertips, anywhere you go.

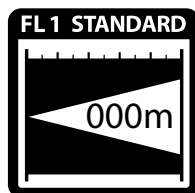

SPOTLIGHT PERFORMANCE STANDARDS:

For the first time ever in the spotlight industry there is an official standard of measurement in effect for accurate comparisons of spotlight performance.

New standards for spotlight performance measurement are now in place and accredited by the American National Standards Institute (ANSI). New Peak Beam Intensity (candela), Maximum Beam Distance, and Battery Run Time (when applicable) measurements are now presented next to all Golight® models.

PERSONALIZED CUSTOMER SERVICE – GUARANTEED

Our personalized customer service means that you can contact us any time. Private consumers and corporate industry buyers alike will speak directly to one of our representatives. We do everything it takes to build an exceptional product, then we stand behind it with exceptional product warranties. That's something you can trust....Guaranteed.

Combining the revolutionary Golight® five-sided parabolic reflector with a Philips axial filament bulb, Cr5 PentaBeam™ Technology captures and directs more useable light than other designs

Definitively Golight

When you see the distinctive, multi-contoured shape and rugged look of our lights, you know it's a Golight. This original is an authentic design of Golight, Inc.

POPULAR APPLICATIONS

Over the years, Golight has had the distinct honor to help people from all walks of life get things accomplished in the dark. Our lights have ridden shotgun on covert ops in the Middle East, guided open-water vessels back to harbor, helped carve roads out of rugged terrain and aided in search and rescue efforts among countless other things. Imagine what you can do with Golight lighting your way!
